

PHILOSOPHY OF ISIDORO MARTÍNEZ'S WEB SITE

- The author, over years of study, has accumulated some information contents (old papers, lectures, exercises, data compilations, procedures, lessons learnt, and so on) that he wants to publish in the net as a contribution to education and science (and personal pride).
- Basically, these contents are edited in *Word*, being mainly scientific text with graphic sketches. (My understanding on copyright issues is included in this site )
- Additionally, part of this information is coded in *Maple* to allow for mathematical and graphical interaction.
- Besides these contents, there are references (links) to external contents.
- All this information (contents and references) is classified according to this author's personal view, and assembled as a web-site using *FrontPage*.
- The initial goal has been to produce an electronic book on Thermodynamics, but, as time goes by, that target seems farther away (I feel ashamed of my inability and ignorance).
- The intention is to produce all the contents in English, for the widest audience, but there are parts in Spanish (flagged). I make extensive use (both in English and Spanish) of two Latin abbreviations: ‘i.e.’ for ‘which means’ (*‘es decir’*), and ‘e.g.’ for ‘for example’ (*‘por ejemplo’*).
- There is no intention to mark what is new in this web site (major enhancements are apparent).
- The present web site is <http://imartinez.etsiae.upm.es/~isidoro/> (138.4.115.156/~isidoro; also <http://webserver.dmt.upm.es/%7Eisidoro/>), but, before 2007, it was <http://imartinez.etsin.upm.es/> (138.100.110.21).
